DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 30-52, drawn to a kit, classified in class 8, subclasses 101, 111, 551, 637.1 and others.
- II. Claims 2-22 and 53-56, drawn to a method of treating wood, classified in class 8, subclasses 101, 111, 402, 116.1, 125,, 126
- III. Claims 23-29, drawn to a chemically treated wood product, classified in class 428, subclass 537.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used in a materially different process such as a process for cleaning and disinfecting a hard surface or dyeing hair.

Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be

Art Unit: 1751

made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process, for example by penetrating the surface with a metal oxide and heating.

Inventions I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product can be made by a materially different process, for example by coating with a metal oxide and treating with a laser, and the apparatus can be used in a process of disinfecting a surface, or a process of dyeing hair.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to James C. Wray on January 2, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1751

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
